Course Price includes: Registration Fees and tuition for the course (training course- 40 hours+ socio-cultural activities), Materials for documentation, Certificate of Attendance.

Description of course contents

This course offers the possibility to acquire new competencies and to use new didactic methods to the educators/ teachers/trainers, by transferring the lessons into an educational environment using "e-learning" based on IT. The course offers best known practices for teaching and learning with Moodle. The educators are helped to set up and manage a Moodle course, to create online courses with more interaction and collaborative content. The Moodle learning environment is fast, flexible and adaptable. Moodle provides a simple, clear view of all learning activities and resources. As mobile devices offer many new possibilities for learning, participants will learn how to create their own effective mobile learning interactions by creating courses on Moodle and sending their courses on the students' phones or tablets.

The course content is not limited to educators/teachers/trainers of a specific subject.

By completing this course, the participants will be able to develop e-learning courses with strong didactic and pedagogic elements and to use the best e-learning practices applicable to both school education and adult education.

This course aims to:

- to develop abilities to use the new technologies (ICT)
- to develop participants' competencies to be able to use e-environment for teaching
- to familiarise participants with specific techniques, tools and modern practices for
